WEALTH DISPARITIES

Inequality in income and wealth is generally large around the world, especially in developing countries. Regionally, the percent share of income doesn't fluctuate greatly, with the wealthiest fifth generally receiving around half of the income and the poorest fifth receiving less than 10%. The wealthiest fifth has also accumulated almost five times the amount of wealth than the poorest fifth.

WENDY BALDWIN

INCOME SHARE PERCENTAGES FOR THE WEALTHIEST AND POOREST FIFTH

CASE STUDY UGANDA & CAMBODIA

In Uganda, women from the poorest fifth of families have twice the number of children than those from the wealthiest fifth. In Cambodia, children in the poorest fifth of families are three times more likely to die before turning 5 than their counterparts in the wealthiest fifth of families.

2013 WORLD POPULATION DATA SHEET

The Population Reference Bureau **informs** people around the world about population, health, and the environment, and **empowers** them to use that information to **advance** the well-being of current and future generations. PRB's 2013 World Population Data Sheet contains the latest demographic indicators for more than 200 countries, including current and projected population by country and region, births, deaths, natural increase, infant mortality, migration, life expectancy, HIV/AIDS prevalence, contraceptive use, and percent share of income of the poorest fifth and wealthiest fifth.
